Prof Paus researches into the biology and pathology of the hair follicle as a microcosmic miniorgan in which many of the fundamental problems of biology can be studied exemplarily. Currently, he is most intrigued by the astounding neuroendocrine properties of the human hair follicle, their impact on mitochondrial function and hair follicle immune status, and the use of adult hair follicle stem cells for regenerative medicine purposes.

**Moderator:** Dra Marta Carretero de la Cátedra de Investigación IISFJD-UC3M-CIEMAT y CIBER de Enfermedades Raras

**Contact:** Paloma García ([marialag@pa.uc3m.es](mailto:marialag@pa.uc3m.es)) y Raquel Largo ([RLargo@fjd.es](mailto:RLargo@fjd.es))

Note: Free seminar. Certificates of attendance are available by registering in advance sending an email to Paloma García.
