

# Clinical and Translational Science Seminar Series

## “Insights from Genome Editing. Gene therapy for rare skin diseases”

Online seminar

**Speaker: Prof. Dr. Ulrich Koller**

Group Leader Gene / Cell Therapies  
Paracelsus Medical University Salzburg, Austria  
6 de octubre 2022, 15:30 horas

Registro previo de asistencia: <https://acortar.link/78K7Uv>

Dr Koller's main goals are to develop RNA and DNA-based therapeutic strategies to specifically correct genes involved in skin rare diseases. He established and further developed the RNA trans-splicing technology, SMaRT, at his institute. Besides the restoration of gene function in genodermatosis at RNA level, his group is also working with “state-of-the-art” protocols to induce a permanent repair of disease-associated mutations.

**Moderator:** Dr. Fernando Larcher, Cátedra de Investigación IISFJD-UC3M-CIEMAT

**Contact:** Ana Reviriego ([Ana.reviriego@uc3m.es](mailto:Ana.reviriego@uc3m.es)) y Raquel Largo ([RLargo@fjd.es](mailto:RLargo@fjd.es))

Note: Free seminar. Certificates of attendance are available by registering in advance sending an email to Ana Reviriego.
